

Website Name:

Cina Designs & Events

Description of website:

Cina Designs & Events is a small business run by a mother and daughter who focus on bringing people's imagination to life, creating unique, handmade, personalized designs. They uniquely make custom décor and keepsakes for homes, nurseries, and special occasions that happen in our daily lives. Everything that is created is done with such pride and care, allowing customers to choose exactly what finish they would like. The website will showcase a gallery of creations that we have made, tell the story of how the business came to be, and allow customers to easily view other examples of personalized items. The site itself will be clean yet colorful to represent our creativity, family warmth, and attention to detail through a designed experience.

List of Pages:

1. **Home** – Overview of the business, brand story, and featured products
2. **About us**- Mom and daughter background, our mission, and values
3. **Shop / Products**- All products with the personalization options
4. **Gallery**- Photos of prior products to help customers get ideas and see the amazing work
5. **Reviews**- Customer feedback
6. **Contact us**- Business contact information and inquiry form

Description of the Data to Be Stored, Manipulated, and Viewed:

The website will store and manage multiple types of data related to products, customers, and user accounts. Product data will include product name, description, price, material, size options, and customization details such as name, date, color, and font. Each product will also have associated images that can be displayed both in gallery view and on the product page.

Items:

- Ornaments - \$15
- Wreath Sashes - \$30

- Monthly Milestone Set with Birth Announcement - \$40
- Acrylic Calendar - \$100
- Wooden Nursery Name Sign - \$85
- Hand Stitched Sweater - \$50
- Personalized Cutting Board - \$40

Customer data will include name, email address, shipping address, order requests, and selected customization options. This information will be stored to allow customers to submit custom orders and for administrators to review and fulfill those requests. The website will also store customer reviews, which will require administrator approval before being published.

Only the admin will be able to add, edit, or delete product information, update pricing, and upload or remove images using a secure login system with authenticated user accounts. Customers will only be able to view the products, submit custom order requests, and leave reviews, but they will never have permission to modify the website data. This ensures secure data management while also creating a user-friendly experience for customers.
